

Senator Sherrod Brown
United States Senate
Washington, DC 20510

Dear Senator Brown,
Malnutrition is preventable. I urge you to co-sponsor the Global Malnutrition Prevention and Treatment Act of 2021 (H.R. 4693/S. 2956), and ask that you increase global nutrition funding.

The bipartisan Global Malnutrition Prevention and Treatment Act will authorize USAID to advance targeted programs to prevent and treat malnutrition around the world; ensure an expanded focus on nutrition programs across global health, food systems, and other sectors; and require robust monitoring to ensure the effective use of taxpayer dollars.

Approximately 811 million people face hunger across the globe, erasing years of progress. Investing in nutrition saves lives, creates stability, and is economically smart; every \$1 invested creates an estimated \$35 in economic return.

Targeted interventions protect the nutrition of women and children during the critical 1000-day period between a woman's pregnancy and her child's second birthday and are essential for ensuring the development of children's physical and mental health.

Christians are called to love and care for our neighbors wherever they are. Genesis tells us that every human being is made in God's image and carries a sacred dignity and immeasurable worth. I urge you to co-sponsor H.R. 4693/S. 2956 and increase global nutrition funding.

Sincerely,
