

DESTINATION IMAGINATION!

We are WILD about DI at St. Monica Catholic School! Our student teams are made up of creative problem-solvers. In the past several years, many St. Monica teams advanced to the State and Global levels to compete with thousands of students, and we won three special DaVinci Awards for creativity!

What is DI?

Destination ImagiNation, DI, is the largest worldwide creative problem solving program for teams in **preschool through college**. The mission of Destination ImagiNation is to foster the development of creative thinking, problem solving skills, and STEAM skills. The emphasis is on the “process,” the learning that takes place all year as the teams prepare their Challenge solutions. Those involved with Destination ImagiNation discover that creative solutions come from teamwork, cooperation, and risk-taking. Team Challenge solutions are presented at a regional D.I. tournament in the spring.

Find Out More!
