**Thursday
October 22nd**

**6:00pm -
7:30pm**

Unveiling the Impact of Technology on Child Development

Learn the neurodevelopmental effects of technology on the growing brain including how exposure to screens impacts academic, attention, emotional, and relational functioning.

Keynote Speaker

Crystal Collier, PhD is a therapist, prevention researcher, and educator named counselor of the year in 2019 by the Houston Counseling Association. She specializes in empowering parents to protect children's developing brains.
