

# TIME TO SCREEN

Detecting a Heart Condition Early  
Could Save Your Child's Life

Most parents that lose a child to a hidden heart condition say they had no idea. Thanks to My HeartCheck that is no longer a concern.

Often, hidden heart conditions have no symptoms. They strike when we least expect and when we are least prepared.

Don't miss this opportunity to have your child's heart checked. We put the power in your hands to protect your child from things they can't feel, and you can't see.

QUICK
