

Math+: Advanced Mathematics Learning Opportunity

Gain an edge – with skills that matter

This is Mr. Kendrick Pitts, a Mathematics Instructor at Jesuit College Preparatory School. I have joined RedwoodPrep to teach an Advanced Mathematics class, **Math+**, this Spring for 6th to 8th grade boys and girls. This Spring's course focuses on Infinity.

I strongly believe in Math+ and would encourage your family to participate. Each Math+ course explores 1 major idea included in Stanford University's introductory math sequence. This is world-class content tailored to younger students. I continue to be impressed by how students get excited and passionate about math during Math+. We want students to be excited about math – and Math+ does a great job doing just that.

This season's course will be taught at Jesuit College Preparatory School on Tuesdays from 4:30 to 5:30 pm starting on Tuesday, March 18 and ending on April 22. The program will cost \$250. Families can sign-up at www.RedwoodPrep.com.

This Spring, the Math+ program will be focused on the concept of Infinity. Infinity can be defined as “something without any limit”. The concept has applications across disciplines but is particularly critical in mathematics where the concept has been at the center of the field since 1655 when John Wallis, a leading mathematician, defined its mathematical symbol.

Most interested students can succeed in Math+. I find that students with a gift for math or a real desire to participate can succeed and learn a lot. Students interested in advanced math classes, high performance on standardized exams or general math ability will particularly benefit.

If you have any questions, please reach out. I hope to work with you and your family on this exciting program.

Best,

Kendrick Pitts
