

technocopia

Make it! is a community Maker festival organized to celebrate our emergence into the warmth of a new season, share our enthusiasm for making, and flex our creative muscles as one community.

Come meet and make with local inventors, engineers, scientists, tech enthusiasts, artists and crafters. Make It! is the place to see these makers demonstrate their creations, hobbies, and projects and share and engage with festival-goers. Makers will demonstrate woodworking, digital fabrication, textiles, papercraft, simple electronics and more. Attendees will have the opportunity to join in the fun; making alongside artists to design and create their own projects. Make It! will feature day-long interactive community events such as modular sculpture, large scale weaving, playful Maker challenges, yarn bomb, screen printing, PPE making demos and more. Make It! Is a free family-friendly day-long celebration of community, innovation and creativity!
