

## Here are Everyday tips to reduce carbon emission and help protect the environment:

Trees help suck up the carbon dioxide, plant a tree and remove 1,000 kilograms of carbon dioxide from the atmosphere.

Get rid of old, energy inefficient appliances. A high-efficiency refrigerator will reduce 225 kilograms of carbon dioxide emission a year.

Replacing just three frequently used bulbs in your home with Compact fluorescent bulbs can reduce 140 kilograms of carbon dioxide emission a year.

Inflate car tyres, properly inflated tyres can reduce as much as 110 kilograms of carbon dioxide emission a year.

Reducing and recycling your garbage by 25 percent will reduce carbon dioxide emissions by 450 kilograms per year.

Using the bicycle or public transport, just two days a week to go to work, you can reduce your carbon dioxide emissions by 720 kilograms a year.

Even when a plugged-in electronic appliance is turned off, it can use energy. Unplug appliances and reduce more than 450 kilograms of carbon dioxide emission a year.

Use fuel efficient vehicles. The potential carbon dioxide reduction for a car that gets 17 kilometres per litre is 2,500 kilograms per year.

Do not leave the computer in stand-by mode. Shut it down and reduce 450 kilograms of carbon dioxide emissions a year.

Line-drying clothes during the non-rainy months instead of using a dryer can reduce 320 kilograms of carbon dioxide emission a year.
