Climate Change and Human Health ECHO

Join our 8-week training series!
Wednesdays 10:00 - 11:15 AM MT / 12:00 - 1:15 PM ET
February 17 – April 7, 2021

What is this program?
The Climate Change and Human Health ECHO will provide an evidence-based curriculum covering the science of climate change and climate-related health effects. Health care providers, public health professionals and community health workers will learn 1) the impacts of climate change on human health and 2) how to communicate climate impacts with their patients/constituents and community members.

Target Audience includes:
- Physicians and all clinicians!
- Public Health Practitioners
- Community Health Workers
- Social Workers
- First Responders

Each weekly session includes:
- Two evidenced-based presentations
- Case-Based Learning
- Strategies to improve communication with patients/constituents re: Climate Change

Continuing education credits provided at no cost
Certificate of Course Completion for Participants!!
