- Marie Shoestring, Admin. Asst.

Standing Rock Treatment Program

- The Standing Rock Treatment Program originated in 1971 as the Standing Rock Alcoholism Treatment and Prevention Program.
- The Standing Rock Treatment Program will provide adult and youth addiction programming to include alcohol/drug abuse evaluations, placement, individual counseling, aftercare, and other addiction services based on client needs.
- **Mission Statement**: The mission of the Standing Rock Treatment Program is dedicated to promoting a healthy lifestyle, restoring balance and harmony in mind, body, and spirit to the Native American adults, youth & their families.

COVID -19 Pandemic March 2020

- Door-to-door flyers

Communication efforts

SRST Client Flow chart

MAT Indian Health Service

ND Indian Health service

- Dr. Brittany Bearstail
- 2 case managers
- 10-15 patients

SD Indian Heatlh Service

- Carletta Aberle NP
- Kelly Aberly NP

PROS vs. CONS

- Getting the client stabilized while minimizing the risk of relapse
- Lack supports such as: housing, income, transportation
- Support systems create a high expectation for success
- Belief that MAT is used as a "crutch"
- An easy way out by using another substance
- Not making the necessary changes in their life
- Common attitude that complete abstinence is the only true way to recovery
- Many inpatient facilities do not have the resources to accept clients on suboxone

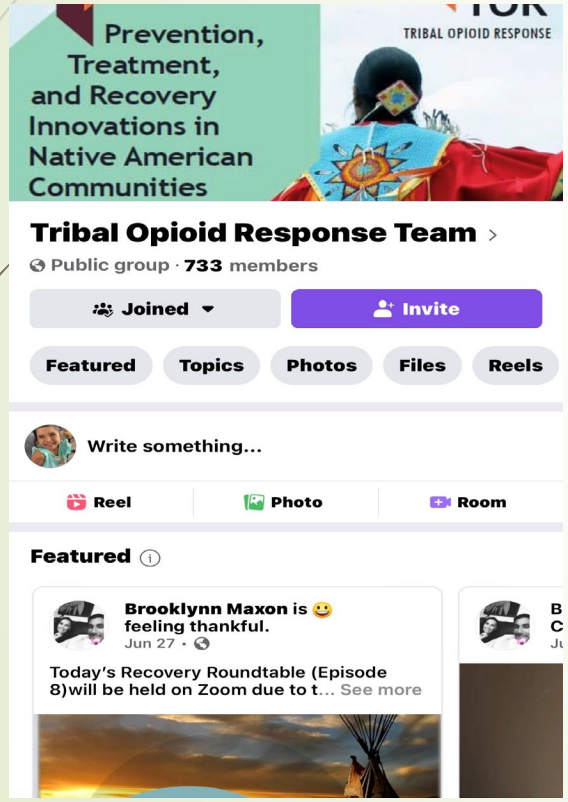

Pros

- Improve patient survival
- Increase retention in treatment
- Clients can gain or maintain employment/school
- Decrease criminal activity
- Increase positive birth outcomes for pregnant women
- Relief from the pain of debilitating withdrawal symptoms
- Reduce potential for relapse
- Curb or reduce intense drug cravings

Standing Rock Tribal Opioid Response Grant

- **Tribal Opioid Response (TOR) Outreach specialist (hired)**
- Responsible for providing outreach in the community to educate tribal elders, leaders, and other tribal members including the population of focus and relevant others about the availability of the TOR project and related services and recovery supports.
- Utilize knowledge of the population of focus, develop or contribute to development of a logical and safe targeted outreach plan to engage participants(or referrals of participants) and provide presentations at tribal community meetings and relevant events.

Social media activities Data

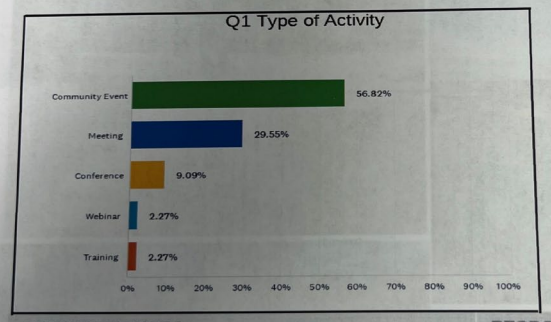

2020-2021 HIGHLIGHTS

Tiwahe Ata Zanipi Prevention Activities

This data was gathered through Survey Monkey. The tool tracks the following:

- The type of activity (ranging from a meeting, webinar, community event, conference)
- Date of activity
- Length of time of the activity/event
- Location of the meeting/event
- The Native Connections SAMHSA indicator met with the activity/event
- Description of the event purpose
- Description of the event/meeting outcomes
- Description of the follow-up items, if any
- Determination of whether event objectives were met and if now the reason and what could be done differently in subsequent events.

Between October 2020 and September 2021, the project team participated in a total of 45 events with a reach of over 600 people. Some of the events included Good Medicine time, youth camp, recovery walk, and the Great Plains behavioral health conference.

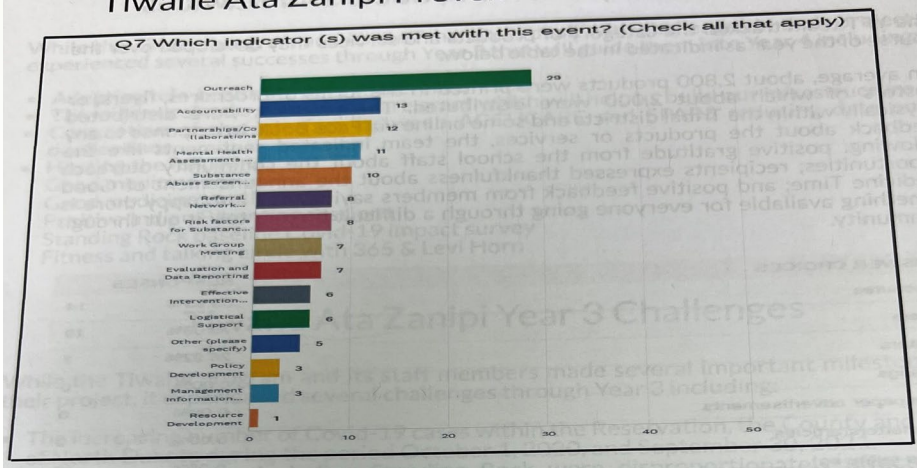

ANSWER CHOICES	RESPONSES	
Community Event	56.82%	25
Meeting	29.55%	13
Conference	9.09%	4
Webinar	2.27%	1
Training	2.27%	1
TOTAL		44
