

## Chronic Disease Screening

**Special Rate \$129 (after \$10 discount)**

The **Chronic Disease Screening** detects existing disease that cause heart attacks, stroke and other serious conditions. Life Line Screening's ultrasound technology helps determine your risk for stroke and other chronic health conditions by looking inside arteries for plaque buildup (atherosclerosis).

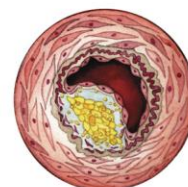

**Plaque buildup can lead to stroke, aneurysm and vascular disease**

Normal artery, allows blood to flow through easily

As you age, arteries can become partially blocked or even collapse

Plaque build-up reduces your blood flow and can be dangerous if left untreated

### Facts You Need to Know

1. Stroke is a leading cause of death and permanent disability.
2. When identified early, 4 out of 5 strokes can be prevented.
3. Ultrasound screenings can help you avoid a stroke and other serious conditions like heart attacks and aneurysms.
4. Screenings are fast, painless, affordable and convenient.

Insurance companies and Medicare generally don't pay for these preventive screenings unless you already have symptoms. Waiting until you already have symptoms can mean waiting too long.

### What's Included in this Package

**Recommended for anyone over 50 or age 40+ with the following risk factors: smoking, obesity, hypertension, or family history of stroke, diabetes or heart disease.**

**Stroke/Carotid Artery Screening** — An ultrasound examination of the carotid arteries, to detect buildup of fatty plaque — the leading cause of strokes.

**Heart Rhythm Screening (Atrial Fibrillation)** — EKG sensors are placed on the arms and legs to detect this common irregular heart rhythm that increases the risk of stroke 5-times.

**Peripheral Arterial Disease Screening (PAD)** — An ultrasound examination of the lower limbs to detect arterial plaque buildup in the lower extremities. Affecting about 8 million Americans, PAD often shows no symptoms and becomes more common as we age.

**Abdominal Aortic Aneurysm Screening** — An ultrasound examination of the abdominal aorta, to detect aneurysms which could cause a ruptured aortic artery.

**Where: Congregation Shaarei Kodesh – 19785 Hampton Dr – Boca Raton**

**When: Wednesday – October 27<sup>th</sup> – Appointments Start at 9am**
