RenalEdge GPO Welcomes Patient Care America as a New Vendor Partner

Participants Gain Access to Customized Bundled Medication Solutions at Preferred GPO Pricing

RenalEdge GPO is pleased to announce a new vendor partnership with **Patient Care America**, a renal healthcare provider specializing in evidence-based nutrition therapies and customized bundled medication solutions for dialysis organizations nationwide. Through this partnership, organizations enrolled in RenalEdge GPO gain access to customized bundled medication solutions designed to improve patient outcomes, simplify medication management, and support more efficient dialysis operations.

Patient Care America is a leader in delivering customized bundled medication solutions designed to simplify medication management, improve medication adherence, and reduce the administrative burden for dialysis providers. The company also specializes in IDPN (Intradialytic Parenteral Nutrition) and IPN (Intraperitoneal Nutrition), providing targeted nutrition support for patients with kidney disease. These nutrition programs are backed by industry-leading clinical research and support the company's mission to deliver the highest quality patient care while advancing outcomes for patients with kidney disease.

“Independent dialysis providers are being asked to do more than ever, managing complex therapies, navigating changing reimbursement models, and delivering high-quality care while maintaining a sustainable operation,” said **Andy Helfan, Chief Operating Officer of Patient Care America**. “At the same time, they often don’t have the purchasing scale and resources compared with the industry’s largest organizations. Our partnership with RenalEdge GPO is about helping level that playing field. By combining the collective scale of independent providers with Patient Care America’s renal pharmacy expertise, we can deliver more competitive medication solutions, simplify the operational burden of managing bundled therapies, and provide the clinical and operational support these organizations need to remain independent, competitive, and focused on their patients”.

Through direct manufacturer partnerships, dedicated clinical support, transparent pricing, and regulatory expertise, Patient Care America works with dialysis providers to deliver solutions tailored to the needs of their patients and organizations. Patient Care America is accredited by PCAB, ACHC, NABP, and URAC, reflecting its commitment to quality, compliance, and patient care.
