

Celebrating CCSI's Navigator Team and Community Partners

On August 11th, CCSI hosted a luncheon to recognize the important role that our community partners have had in helping the [Navigator Program](#) and the [Aged, Blind and Disabled Program](#) to achieve their goal of providing high quality, one-on-one assistance to individuals seeking access to health insurance coverage. **Kim Wynn, Program Manager**, provided an overview of the program's accomplishments

during the past year, including being recognized by the NYS Department of Health as having the highest productivity rating in the state as measured by the number of applications completed per FTE. **Bobbi McGarrity, Quality Assurance/Lead Facilitated Enroller for the Aged, Blind and Disabled Program (ABD)** also shared information about the important work of this program. We are grateful for the partnerships we've formed with these agencies, who have provided CCSI's Navigator and ABD staff members with in-kind space at locations throughout the community. Being able to meet with individuals at locations and times that are convenient for them has helped make the process of applying for health insurance in Monroe and Livingston County more accessible to those in need. We thank them for their support!
