

# Deeper Dive into the Universal Waste Rules Webinar

February 23, 2021 at 2:00 pm EST

**Zak Kabelen, DERR  
Environmental Specialist**

Did you know that you can reduce your hazardous waste requirements by managing fluorescent lamps, batteries, aerosol cans, antifreeze, paint, and paint-related waste as universal waste? This webinar will cover Ohio's universal waste rules, a subset of the hazardous waste rules that provide more flexibility and less stringent management options for these commonly generated hazardous wastes.

Join Ohio EPA's Division of Environmental and Financial Assistance, in conjunction with the Division of Environmental Response and Revitalization (DERR), on February 23 to get the scoop on what's new, updates, and highlights for Ohio's universal waste rules.

After registering, you will receive a confirmation email with a link to join the session. Continuing Education Units will also be available for this webinar.
