

2022 IASWCD April Lunch 'n Learns

Virtual Learning For Indiana District Staff and Supervisors at 12 noon (EDT)

L

April 6: Resources to Assist Small Farm & Urban Customers

Learn about resources for how to do a site visit, soil testing and analysis labs, cover crop seeding rate tables, crop rotation information, nutrient management documents, low-till small farm equipment, and more. Our time will be spent on where to find particular information and resource documents to assist urban and small farm customers.

Presenter: Elli Blaine, Urban Soil Health Program Director. Register: https://bit.ly/LnL_4-6-22

April 13: Work Smarter Not Harder: Planning & Prioritizing Invasive Management

Invasive plant management is often overwhelming for landowners and managers. Even experienced landowners can feel the need to give up in the face of a heavy infestation or large acreage filled with invasives. This presentation will cover how to assess, plan, and prioritize invasive plant management, all with the individual landowner in mind. Instead of focusing on a select set of invasive plants, this session will highlight approaches to invasive management that can be used on a range of species across the state. The goal is to increase the efficacy and adoption of invasive management practices by landowners.

Presenter: Emily Finch, SWCD Invasive Species Specialist, Dubois, Martin and Daviess. Register: https://bit.ly/LnL_4-13-22

April 27: Optimizing Field Day Impact and Attendee Experience

Impact of Field Days for target audiences can be optimized with a planning framework that includes marketing, delivery, and evaluation. This presentation will challenge attendees to think big and outside the box to reach new audiences and improve conservation adoption as a result.

Presenters: Leslie Fisher, Resource Conservation Specialist, Benton County SWCD and Seth Harden, Upper Wabash River Project Director, TNC.

Register: https://bit.ly/LnL_4-27-22

Every session: 12 noon to 1 pm (EDT)
