

The Indiana Silver Jackets Fluvial Erosion Hazard (FEH) Mitigation team is holding a series of five free workshops around the state to introduce the FEH program and to review a new manual on tools and methods developed in the most recent phase of the FEH Program. The manual outlines methods of investigation and best practices for addressing fluvial erosion in locations where avoidance is not an option. The workshops are funded by the Indiana Office of Community and Rural Affairs (IOCRA) and are open to all interested individuals. The workshops are appropriate for geologists, engineers, resource managers and elected officials concerned with erosion and flooding in Indiana's streams and rivers.

The following is a list of the available workshops. You are welcome to attend any workshop. Please note that all regional workshops will cover the same content. Continuing education credits will be available.

Please email Nancy Smith at [nsmith@cbbel-in.com](mailto:nsmith@cbbel-in.com) to register for a workshop. **Let her know which workshop you are registering for and whether you will be seeking continuing education credits.**

<u>DATE</u>	<u>TIME</u>	<u>LOCATION</u>
