

INDIANA FORAGE COUNCIL

# ANNUAL MEETING & SEMINAR

FEBRUARY 27, 2020

COST = \$20

**WILLIAM H. DANIEL TURFGRASS RESEARCH & DIAGNOSTIC CENTER**  
**1340 CHERRY LANE, WEST LAFAYETTE, IN 47907**

**RSVP\* BY FEB. 20TH TO: [JOHNSONK@PURDUE.EDU](mailto:JOHNSONK@PURDUE.EDU) or (765) 494-4800**

*\*Please include any dietary restrictions*

**Rodney Hufford**, 3rd generation member of Middlefork Meadows Farm, manages a grazing operation with his brothers, dad and grandfather on their Clinton County farm. Their intense grazing rotation, incorporating annual and perennial forages, allows them to graze much longer into the winter and feed less hay.

**Dean Gangwer**, of Gangwer Farms in Carroll County is an Indiana Master Cattleman, and runs a diverse operation. Grain, Angus cows and their calves, finished freezer beef, hay and other products are produced. He utilizes a monoslope barn for finishing cattle and is actively developing the grazing acres.

## SCHEDULE (EST)

4:30 PM	ANNUAL MEETING
6:00 PM	MEAL & FELLOWSHIP
7:00 PM	SEMINAR

**Shelby Gruss**, a Ph.D. student in the Purdue University Agronomy Department and recipient of first place in the Emerging Scientist Competition at the 2020 American Forage and Grassland Conference, will discuss her research about an experimental brown midrib sorghum-sudangrass that does not produce prussic acid. She will share research results from a grazing experiment that compared the preference of three sorghum-sudangrass hybrids and a sudangrass hybrid by sheep.

**ATTENDANCE AT THE 4:30 PM ANNUAL MEETING IS NOT A REQUIREMENT FOR PARTICIPATION IN THE REST OF THE EVENING.**
