

CREATING TRUSTED INDOOR ENVIRONMENTS THROUGH HOLISTIC BUILDING EVOLUTION

Packaged air, surface and touchless product solutions customized for every facility.

Businesses face a tough new reality as people question the environmental health of the facilities they occupy. Owners must be proactive and implement smart strategies to purify their building's air and surfaces, and also install touchless amenities. This will give people comfort in knowing that they are in a safe space.

Solutions are available to reduce contaminants in any type of facility, attacking microorganisms including COVID-19, the flu and common cold. These long-term solutions will minimize the risk of exposure to harmful substances in the facility, giving businesses the opportunity to prove that they take the safety and health of their facility's space seriously.

SOLUTIONS TO CREATE A CLEAN INDOOR SPACE. OCCUPANTS EXPECT IT.

1

CHALLENGE

Businesses have experienced major disruptions due to COVID-19, and the future is still uncertain. **They are left wondering if people will return, and how to appeal to an uneasy population constantly worried about their health and safety.**

2

SOLUTION

Owners and operators can prove that their facility is safe by **implementing air and surface purification systems, and touchless amenities.** Not only will it bring people back into the facility, but it will prepare the business for future challenges.

3

IMPACT

Once a facility has been upgraded, owners can **market their investments with facility signage at entrances, and advertisements online.** This will educate people on the facility's safe environment.

• • • A SURVEY CONDUCTED BY YPO, A GLOBAL COMMUNITY OF CHIEF EXECUTIVES, FOUND THAT HALF OF EXECUTIVES SAY ONE OF THE GREATEST OBSTACLES TO THEIR BUSINESS VIABILITY IS LOW DEMAND FOR PRODUCTS/SERVICE DUE TO CHANGES IN CONSUMER BEHAVIOR. THIS IS LIKELY DUE TO CONCERNS REGARDING THE HEALTH OF INDOOR ENVIRONMENTS.

A SAFE BUILDING BY RK CREATES LONG-LASTING PEACE OF MIND.

Our licensed and certified indoor comfort technicians will clean and evaluate your systems and operations, and make recommendations on advancements.

Solutions are customized to each facility, and by working with one team to identify, source and install the products you need, you'll save money.

PURIFICATION TECHNOLOGY INSTALLED DIRECTLY INTO AN HVAC SYSTEM CAN REDUCE HARMFUL BACTERIA AND VIRUSES IN THE AIR.

People are hyper-sensitive to facility cleanliness. Make investments now to ensure your facility is a trusted space. It's not a matter of if purification technology will be a building requirement, but when. Stay ahead of future interruptions.

CREATE A CUSTOM PACKAGE OF THE PRODUCTS YOU NEED.

1

HVAC AIR AND SURFACE PURIFICATION SYSTEMS

- A bi-polar ionization system is installed directly into your existing HVAC system
 - Kills mold, bacteria and viruses
 - Neutralizes odors and reduces particulates
 - Controls static
 - Reduces energy use
- MERV 13 Filtration
 - Requires system compatibility
- IAQ Monitoring Stations

2

PRODUCTS THAT MINIMIZE TOUCHPOINTS

- Foot door pulls
- Toilet sensors
- Occupancy sensors for lighting
- Touchless soap dispensers and faucets

3

ANTIMICROBIAL COATING SYSTEM FOR SURFACES

- MicroShield 360™ coating system is electrostatically applied to high touch point surfaces throughout the facility
- MicroShield 360 coating system is EPA registered and FDA approved for direct food contact surfaces. The coating system can be applied to 1,000 facility types and 1,500+ surface types

4

HAND SANITATION STATIONS

- Install hand sanitation stations throughout your facility for easy access
- Stations can be customized and branded with your logo

5

SURGICAL GRADE CLOTH MASKS

- Offers particle protection
- Nose piece for comfort
