## FOR IMMEDIATE RELEASE

### RK Mission Critical, LLC Launches **THE DISRUPTOR™** Miner Container Product Line

Denver, Colorado, March 15, 2021 — [RK Mission Critical, LLC](#) (RKMC), one of the nation's fastest-growing modular solutions providers, announced the official launch of **THE DISRUPTOR™** cryptocurrency miner container product line.

After two years in development with some of the most innovative companies in the cryptocurrency, Bitcoin mining, and GPU space RKMC has developed an efficient, cost-effective, and flexible product line designed to house not only the miners of today, but also the miners of the future. RKMC's **THE DISRUPTOR™ 2000** is the nation's first 2MW UL certified container that is fully designed and built in the United States. "We have raised the standards and expectations of the cryptocurrency ecosphere by using our 140,000 square foot manufacturing facility and lean six sigma manufacturing and integration processes," said John Marrinucci, President and Managing Partner of RK Mission Critical. RKMC is setting new expectations for the industry with respect to lead-time, quality and cost. Through its association with RK Industries, LLC (RK), Mission Critical may be the only company in the US with the financial strength, capacity, and construction, fabrication, and manufacturing knowledge to deliver volume at industry-leading lead times.

"RK Mission Critical is fast becoming the nation's leader in the design, manufacture and delivery of self-contained cryptocurrency mining containers. The formal introduction of **THE DISRUPTOR™** product line to the market is very exciting for our company and our customers," said Marrinucci.

#### About RK Mission Critical, LLC

[RK Mission Critical, LLC](#) is a leading provider of fully customizable off-site manufacturing solutions for the mission critical, data, telecom, power and disaster relief markets. RK Mission Critical implements a full range of off-site manufacturing strategies for its customers ranging from the simplest multi-discipline prefabrication to the most complex, fully integrated multi-disciplined data center facility.
