

Small group Creative Problem Solving

Destination imagination builds important lifelong skills, such as, teamwork, problem solving, and critical thinking and extends STEM and performing arts skills. Teams solve challenges involving technical, structural or theatrical oriented problems, stimulating children's ability to think quickly and creatively. Training is provided for parent volunteers called "Team Managers" to facilitate the groups of up to 7 students. We will put teams together at the end of this meeting

Bring your children and come to an information meeting in Fallon Middle School!

Date and Time: To be confirmed
