

## A New School Year Begins

The 2021–22 school year began on August 10<sup>th</sup> with students and teachers eager to return to a traditional classroom setting and 'normal' school activities after more than a year of restrictions and uncertainty caused by the COVID-19 pandemic.

Students in grades Pre-K through 8 had a staggered start the first week to allow students time to transition to their school day routines with minimal distractions, while high school students started back full time from day one.

Even with enhanced safety protocols and additional sanitization procedures in place, everyone is excited about the start of this new year!
