

## KDS Seventh Graders Visit Genetics Lab

The KDS 7th Grade Honors Society trip to Hudson Alpha in Huntsville, Alabama was something the students had been excited about for the entire school year. KDS Middle School received an educational grant from PPG Industries and a Title One grant from Hudson Alpha, so this trip was completely free.

Students learned how to use a micro pipette, and the electrophoresis machine. They toured the building and learned all about the breakthrough discoveries that are happening in our own backyard in the world of genetics. All the students enjoyed this awesome trip.
