

## Student Work Program in Full Swing

The KDS Work Scholarship Program is providing jobs for 20 high school students during the summer of 2019. The students work as clerical assistants in the school offices, as janitorial helpers, and as part of the campus maintenance and landscaping crew. They are learning real-life work skills they can take with them when they graduate, and they are earning money for themselves and their families.

This valuable program provides practical work experiences for KDS students not only during the summer months, but during the school year as well. The primary source of funding for the KDS Work Scholarship Program is a bequest left to the school by a DAR member from Seattle, Washington.
