

## AP Biology Students Sleep in the Deep

The KDS DAR High School Advanced Placement Biology classes recently took a field trip to the Tennessee Aquarium. This, however, is no ordinary field trip as the students are allowed to spend the night in the Aquarium and "Sleep in the Deep".

Students get a private and behind-the-scenes tour of the aquarium, along with an extraordinary amount of biological and ecological information associated with the maintenance of the aquarium and health of the animals that go hand-in-hand with what they have been studying in class.

It is a wonderful trip, and students say it is one of their favorite experiences of the year in AP Biology.
