

Hip Hip Hooray! It's the 100th Day!

Each year the KDS Elementary students and their teachers look forward to the 100th day of school and the fun ways they will celebrate this milestone. Activities and lessons in this theme unit provide opportunities for students to practice math and sharpen their observational skills.

The teachers helped the students celebrate the 100th day with counting activities in the classroom. They also asked students to consider what might go on in their lives 100 days and 100 years from now.

Some students dressed up as if they were 100 years old and others dressed to commemorate the 100 days of fun they have had during this school year. Others decorated shirts with 100 items or fun sayings about 100.
