FREE Workshops

PWP hosts water conservation workshops and events such as the Rain Barrel Distributions, Spray-to-Drip Demonstrations, Irrigation Tune-Up Workshops, and much more!

Water Survey

PWP customers can apply for free virtual and in-person indoor/outdoor residential surveys for their properties. These surveys provide customers with recommendations to improve outdoor landscape and indoor water use efficiency. Visit waterefficiencysurvey.com for more information.

Ideal for Residential Customers

Home Improvement Program

Offers an in-home evaluation and personalized installations, all at no cost. Free water-saving services include: landscape & irrigation assessments, low flow showerhead installation, toilet replacement, and more.

Ideal for Residential Customers

Spray-to-Drip Retrofit Program

Replace your sprinkler system with more efficient drip irrigation. PWP offers FREE Spray-to-Drip Retrofit Kits to single-family residential customers.

Turf Replacement Rebate

To help you save water and money, PWP has partnered with Metropolitan Water District to offer a Turf Replacement Rebate for **\$3 per square foot of replaced turf.**

Program Details:

- Remove at least 250 sq. ft. of turf in your front, side, and/or back yard, not to exceed the maximum amount of 5,000 sq. ft.
- Design the converted area to capture rainfall
- Receive a maximum rebate of up to \$10,000

Visit PWPweb.com/TurfReplacement for additional program requirements.

Enhance Your Transformed Landscape

PWP recommends that you add the following tools to your landscape for ideal water savings.

Check out the rebate amounts on the back to see how much more you can save!

Rain Barrels & Cisterns

A cost-effective way to capture rainwater for irrigation. Instead of going down the storm drain, the rainwater gets redirected into the rain barrel/cistern and allows you to return it to the soil and recharge the groundwater.

Weather Based Irrigation Controller

Provides the appropriate watering schedule, adjusts for weather changes and irrigates based on the needs of the landscape and soil conditions.

Rotating Sprinkler Nozzles

Eliminates wasteful runoff by applying directed, uniform water distribution to your landscape.

Water-Smart Landscaping Guide

Need design ideas for your landscape and plant selection help? PWP offers an online design guide which takes you through multiple garden galleries featuring a variety of plants for the Southern California climate. You can select the plants and colors you like and the interactive guide provides you with a printable list you can take to your local nursery!

Check it out online at PWPweb.com/Guide
