Community Engagement Results

Community Engagement Results for Parks & Pool

This summer, the city engaged the community in a pool, parks and recreation research project to solicit feedback on their vision for new and improved recreational facilities. Every member of the Mayfield Heights community was encouraged to participate.

Multiple channels were used to promote the project and to collect data. The survey centered around pool amenities, playgrounds, multipurpose fields, trails, and other recreational amenities. Over 850 responses were received. You can view the survey results [here](#).

Dragga Pool, which is entering its 63rd season in 2021, is one of our first priorities. The preliminary, conceptual site plan phase for the pool and community center is underway. Anticipated completion of this phase is a few months. The next step is to select an architect / design firm to develop the design phase of the project which we anticipate in the early part of 2021. Stay tuned for future updates!
