Dear Dr

If a patient is sick, suffering, confused and dysfunctional, who would you turn to?
A physician, of course!

If a community or City has the same afflictions, then who would be better than a highly esteemed physician who has years of experience in patient care but also having served at the highest levels of the state government.

Sacramento is in that crisis... increasing crime, homelessness, drug use, decaying city infrastructure, loss of central core business and overall dysfunction.

Richard Pan, MD, MPH has the prescription for those maladies and is dedicated not just to rhetoric but results!

That is what physicians do -- and that is why I trust him to be our doctor to provide healing and prosperity to our community as the next mayor of Sacramento.

I have known Dr. Pan for over 25 years in his capacity as past president of the Sierra Sacramento Valley Medical Society, Delegate to the California Medical Association, and past Assemblymember and Senator for the 5th largest economy in the world. He has been an ardent supporter of physician financial health and public health and has stood firmly with policy of the California Medical Association.

Dr. Pan shifts from politics to pragmatism and science to identify problems and remedy them.

Our current sick City of Sacramento's differential diagnosis is long but affects you as a practicing physician and a citizen.

He opposes Measure C, on the Ballot next month to more than double yearly business taxes to \$684 per year for licensed professionals. If you have multiple physicians, NPs, or other professionals you will see a tax bill per year easily in the thousands of dollars. One more encumbrance to your office serving the community, and it may drive out more professionals out of the city, further burdening the patient access.

Additionally, his platform includes:

- improving public safety and removing blight,
- reducing homelessness and increasing affordable housing,
- and growing the regional economy while eliminating the city's structural budget deficit.

Please help me to help you and our community by supporting and electing Dr. Richard Pan to the Sacramento mayoral office.

He is tough, resilient, compassionate, data driven, intelligent, focused.... All the same qualities that make you a great physician!

Dr. Pan is the one who has the right prescription and acumen in the hard work of curing the ills of the city.

Make the healthy choice with your support and vote for Dr. Richard Pan as the next mayor of Sacramento.

Sincerely,

Richard A. Jones, MD
