

Is your neighborhood in need of
Community Development Block Grant
(CDBG) funding?

Are there
waterlines that
have exceeded
their useful life?

Are public
facilities in
need of
improvements?

Have you
identified a
need for a
public service
project?

Would an
economic
development
program assist
underserved
persons?

If you answered “yes” to any of those questions, NOW is the time to start exploring the possibility of obtaining future Community Development Block Grant (CDBG) funding to help your community.

CDBG funding is granted to qualified infrastructure or public facility improvement projects that are located in designated low- to –moderate-income (LMI) census tract/block group areas. Funding is also granted for qualified economic development or public service projects that directly benefit eligible LMI persons/families in your community.

If you believe you have a project that could qualify for CDBG funding, please contact the Stark County CDBG Department. Staff is available to answer questions or to meet with your municipality/township/non-profit agency to discuss potential project ideas. Call to start the conversation today!
