

## National Assessment of Educational Progress: 2024 Math and Reading Assessments

### Topline Takeaways: National Scores\*

Overall, U.S. students have not recovered from the devastating impact the pandemic had on education.

**National scores are below 2019, or pre-pandemic levels in all tested grades and subjects.**

This decline **accentuates trends that began prior to the pandemic**: Scores in both subjects have been stagnant or declining for a decade.

Gaps continue to grow between higher-performing and lower-performing students, a trend that has persisted for more than a decade.

In 2024, there are different national stories for math and reading, compared to 2022:

- **Nationally, reading scores are down in both grades.** Rather than making up lost ground from the pandemic, students are still sliding.
- **Math scores are up in 4<sup>th</sup> grade, which reflects progress. Math scores are flat in 8<sup>th</sup> grade.** In both grades, students are behind where their peers were pre-pandemic.

\*Private school (including Catholic school) students are included in the national scores.
