

Advanced Electric and Motor Controls, Inc., AEAMC is pleased to announce the opening of our first satellite office in Elgin, Illinois at 455 Shepard. Expanding into the third largest market in the US is a perfect evolution for our mature product line and services. In addition to our large local inventory, we have equipped our production floor with brand new test equipment, including a DDA-6000 – Primary Injection Test Set, a MS-2A - Overload Relay Tester, a BG-29092 Power Supply, a DLRO100X – Digital Low Resistance Ohmmeter and a MIT300 - Insulation and Continuity Tester just to name a few pieces. This equipment allows us to test all our products to NETA specifications. If you are in the neighborhood, please stop in and say hi.
