

Using MissionInsite working with ACS Technologies During the COVID-19 Pandemic

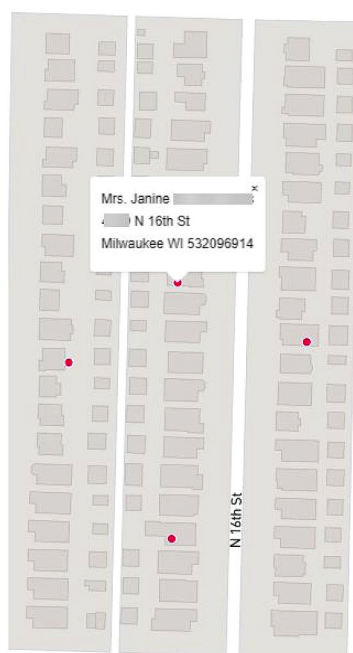

These are challenging times for all of us and especially for the family of faith. When churches are unable to gather, they look for ways to stay connected to friends and family. We see creative worship experiences taking place through video streaming to ensure that the family of God stays “connected” in times when normal worship is no longer an option. I have seen the springing up of “drive in” churches again, one in which a pastor spoke from the back of a Ford pickup truck! In every way we can think of, it’s about the people of God staying connected to the church and caring for one another AND for their neighbors.

MissionInsite churches have wanted to learn more about their congregations and visitors. Using People Plot they have plotted over **5 million people**.

MissionInsite and ACS Technologies are here to assist you as your care for your church family and community during these challenging days as we battle COVID-19.

Using MissionInsite People Plot – view your church’s people at neighborhood level.

People Plot allows you to view your church’s people down to neighborhood or even street level. The red dots illustrated to the left are people plotted by a client church. Notice you can view a family name by clicking on the red dot. You can draw a shape (polygon) around any neighborhood or street and download/export an Excel list of your people on that street.

STEP 1: Draw a shape (polygon) around your church’s people on a single street (or neighborhood) to discover congregant households living on that street.

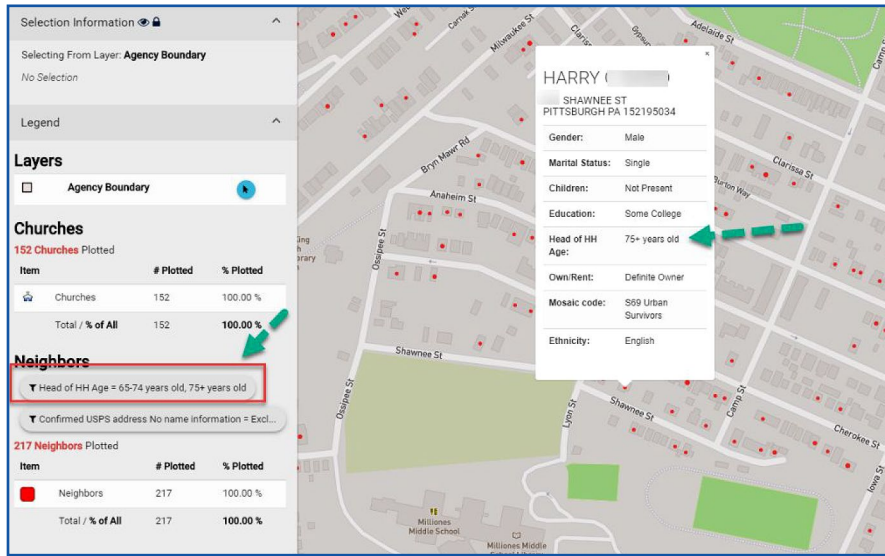

STEP 2: Identify potential servant leaders present in that neighborhood. Using congregant records (and personal knowledge), identify households that may be at risk during the pandemic due to age or other medical conditions.

STEP 3: Connect servant leaders with at risk households in their neighborhood.

Use *Neighbor Center* – to further identify specific household demographics in neighborhoods you serve.

Neighbor Center allows the display households in any neighborhood or community by selected demographic attributes.

STEP 1: Zoom in to an area where you believe there are significant numbers of households with senior population at risk. In this illustration the selection was head of household 65-74 years old AND head of household over 75 years old.

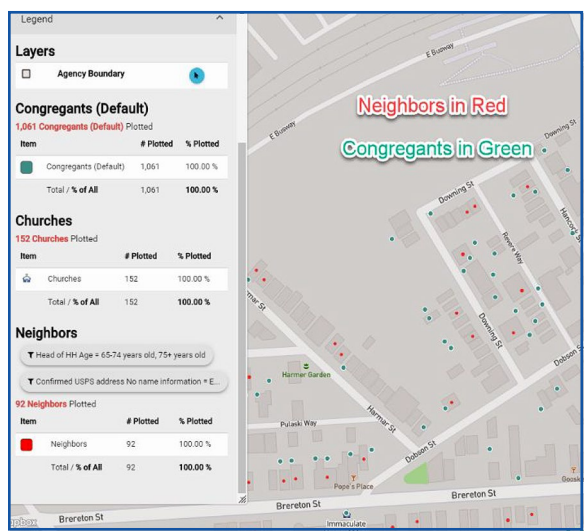

STEP 2: Select any displayed dot to discover the name and address of a neighbor at higher risk due to age.

Often in more populated urban, suburban or even county seat towns, seniors may cluster together in neighborhoods allowing for easier engagement by servant church members.

STEP 3: Plot your people to view servant church leaders geographically near neighbors at risk.

What are the possible ways the church could “love our neighbors”, being careful to follow your community’s mandated distancing guidelines?

- Leave groceries at the doorstep for seniors concerned about doing their own shopping.
- Leave medical or cleaning supplies for households unable to leave home because of medical conditions.
- With appropriate permissions, deliver prescriptions to households with medical challenges.
- Invite church members to make face masks for distribution, mask patterns are available. <https://sew4home.com/diy-face-mask-patterns-resources/> (Lots of options online).
- Consider providing meals for families with children home from school that may have been counting on school meals.
- Continue to support restaurants with carry out options. Consider providing carry out meals to families at risk or providing gift cards for home deliverable meals.

Your Real Ministry Partner

ACS Technologies (ACST) has supported the ministries of nearly 50,000 churches and organizational offices over the past 40 years. In addition to MissionInsite, here are other ways we can help you as a partner:

Church management

Over 8,000 churches are using Realm, a cloud-based solution, to unite their pastors, staff and congregants during the COVID-19 Pandemic. Realm allows you to manage everything from small groups, communications, pastoral care, volunteers, and operations. Equipped with apps for staff and congregants, your entire church can access Realm, anytime anywhere.

Fund-based accounting

Our fully integrated accounting solutions including general ledger, accounts payable, payroll and more. You can assign funds and budgets to departments for easy reporting, manage vendors, pay your employees, and easily reconcile your giving because transactions automatically post to the general ledger. And, role-based security and a change log ensure security and traceability.

Online giving

Accepts gifts 24/7 via your website, text, or our mobile apps with our online giving solutions powered by Vanco. You can also accept recurring donations, create pledge campaigns, allow donors to give to specific funds, and log cash and checks. In addition to giving, congregants can also manage their own profile and payments as well as print their own contribution statements.

Background Checks

ACS Technologies has partnered with Verified First to offer integrated, comprehensive, and stringent background checks. You can easily and securely screen staff, volunteers, and applicants, ensuring your church, your children, and your finances are safe.

Unparalleled Service & Support

Helping churches is why we do what we do. An onboarding specialist will guide you through the transition, we offer a variety of free and paid training and implementation options virtually or onsite, and our support team is ready to help you, answering most calls in under a minute.

We care about your people and the life changing impact you want to make in their lives. We stand with you to go into all the world, starting with our local neighborhood, and make disciples.
