

WHO WE ARE SOILMAP is a full-service agronomic center providing precision agriculture solutions through services, sales and support to customers looking to add value to their farming operations. These products and services assist farmers in gaining insight into each field they operate in order to improve management decisions. All the services and solutions offered by SOILMAP are customized to each farmer's individual needs to optimize specific objectives.

1

SENDING to YOUR BLENDER
Integrates with your blending software to send/receive order

- Orders are created in SOILMAP and the passed to your blending software
- Buggy cart or direct spread orders can be created
- Set individual batch export
- Only see what hasn't been exported

| Export | Creation Date | Created By | Type | GSS Acres | MAPS Code | Field Name | Farm Name | DM Name | BlendSheetID |

ORDER RECEIVED

The order is picked up by the blending software

2

- Once picked up by blending software order is dispensed for processing

3

ACCOUNTING INTEGRATION
Seamlessly pass information from blender back into accounting

- Scale totals are then passed into accounting
- Fully integrated customer and product list
- Seamless flow of data

SOILMAP has the ability to send an electronic transaction file that contains all necessary data on a blend-sheet formulation to the blender system's computer. This saves the time and possible errors of manual entry. Once the blending equipment dispenses and/or mixes the assigned products the measured values can be returned to SOILMAP and accounting software via the same system. It does not use the absolute newest technology; but instead a time tested system that has worked flawlessly over the last five years.

- Easy To Use Interface
- Customized Blending Screen
- Support To Help Configure
- Web Service Integration
- Direct Spread/Buggy Cart Orders

BENEFITS of BLENDER
