

WHO WE ARE SOILMAP is a full-service agronomic center providing precision agriculture solutions through services, sales and support to customers looking to add value to their farming operations. These products and services assist farmers in gaining insight into each field they operate in order to improve management decisions. All the services and solutions offered by SOILMAP are customized to each farmer's individual needs to optimize specific objectives.

1

BLENDSHEETS
Create Plans, Blendsheets and Integrate with Accounting

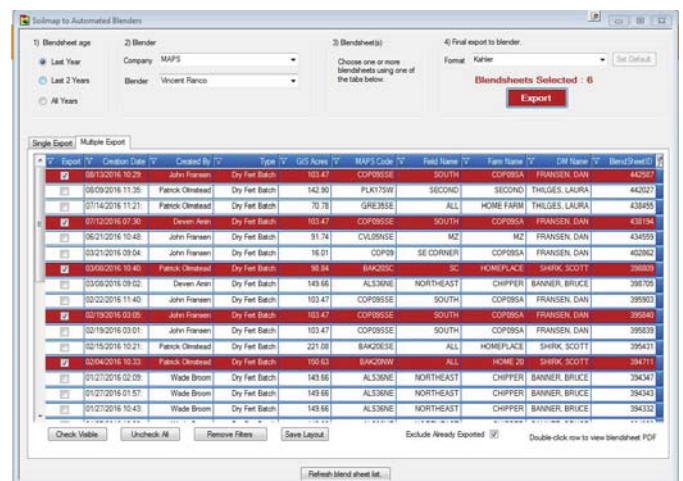

- Create crop plans with an itemized list of products and rates, and give to your growers
- These plans are turned into Blendsheets
- After product application, collected information can then be sent to your accounting partners

CREATE VRT RECOMMENDATIONS
Use Data Collected from Soil Samples, SSURGO, Management Zone and More

2

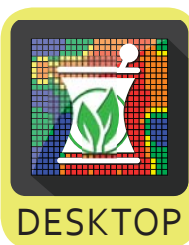

- Electronically send spread files to the applicator when connected with Fleet Dispatch or from our controller output screen

3

AUTOMATED BLENDER
Fully Integrated with Kahler, Murray, and Junge

- Work order is created in SOILMAP and seamlessly passed over to your automated blender
- Once the blending is completed, SOILMAP can return the actual scale totals to your accounting interface

SOILMAP Desktop is a web application tool designed to process ag-related data and information that has been gathered from soil or grid sampling along with collected field history. Guided by the SOILMAP team This software provides your agronomists the data to determine the fertilizer needs for your grower.

SOILMAP strives to provide first class software tools focused on servicing the needs of ag retailers and consultants so they can build a stronger grower relationship.

- Customized Grid Results Book
- Advanced Data Analysis Reports
- Fieldwatch/Driftwatch Integrated
- Quality Support And Training
- Plus Much More!
