Mobile Visual Field Scanner

Benefits for you and your patients

- Tests independent on room illumination
- Lightweight and comfortable
- Exportable results on Surface Pro tablet
- No internet connection necessary
- Patient audio support
- Integration with all OCULUS diagnostic devices
- Outstanding OCULUS technical support

OCULUS®

OCULUS Easyfield VR™

Easy visual field tests using VR technology and audio support

The Easyfield VR™ Headset fits every patient and can easily be cleaned with sterile wipes.

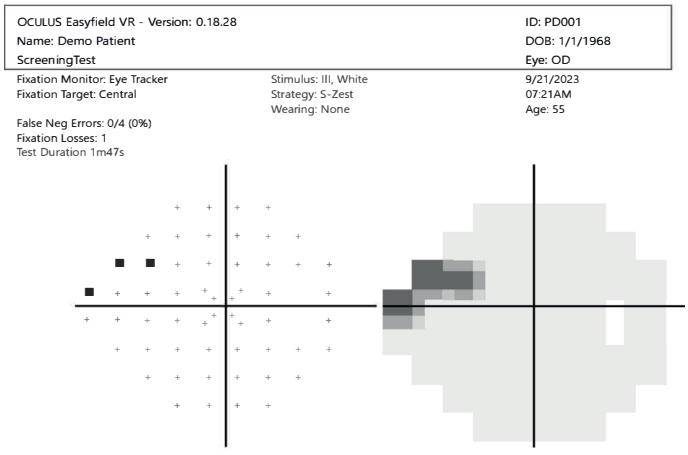

The hand controllers are used by the patient during the examination. Patients can use either hand for feedback.

Eye care professionals can comfortably start and monitor the examination process by using the tablet.

The cutting-edge virtual reality technology of the Easyfield VR™ allows you to perform vision tests in a variety of settings and considerable improves your patient flow. The lightweight and cushioned headset will skyrocket the acceptance of visual field screening among your patients, while combining it with tests for color or stereo vision. Reliable findings are ensured by the high accuracy eye tracker monitoring patient fixation. The results of the tests are recorded in the familiar environment of the OCULUS Patient Data Management.

Visual field screening test results

Visual field tests with continuous eye tracking

- Screening
- 30-2, 24-2, 10-2
- Ptosis
- Esterman
- Supra-threshold
