

A.I. Corner

Sept. 2026

At the 2026 National Convention, attendees listened to a presentation on the basic functionality of generative A.I. tools like ChatGPT, CoPilot, and Claude. The presenters also shared several potential use cases for chapters to help them streamline certain tasks. In the A.I. Corner column each month, we'll explore different ways you can utilize A.I. in your chapter's work.

Many chapter members wear multiple hats, and writing may not be everyone's favorite task. The good news is that A.I. tools can help you get started with common communications such as event announcements, social media posts, newsletters, and press releases. Like any tool, the quality of the result depends on the information you provide. A good result begins with a good prompt! Here's an example prompt you could use to create a press release promoting your chapter's cheeseball sale:

Prompt:

Write a professional, community-focused press release for the [chapter name] chapter of Psi Iota Xi cheeseball fundraiser. Include the following details:

- Chapter name: [Chapter Name]
- Location: [City, State]
- Purpose of the fundraiser: [Scholarships, community projects, arts programs, etc.]
- Cheeseball varieties available: [List flavors]
- Price per cheeseball: [Price]
- How to place an order: [Phone, email, website, contact person]
- Payment methods accepted: [Cash, check, online payment, etc.]
- Pickup or delivery details: [Date, time, location]
- Deadline to order: [Date]
- Contact information for questions: [Name, phone, email]

Write in a friendly, engaging style suitable for submission to a local newspaper. Include a headline, a brief description of Psi Iota Xi's mission, and a call to action encouraging community members to support the fundraiser.

Simply replace the bracketed information with your chapter's details and paste the prompt into your favorite A.I. tool.

REMEMBER: Never publish anything generated by A.I. without human oversight. Always review and edit content prior to publication.
