(801)735-5755

After watching multiple families who knew little about substance or behavioral addiction have their worlds turned upside down, Claire began to find ways to focus her Intervention/Consulting practice on not only the addict, but also the family. Every recovering person has a family just as in need of support as the addict on the shared journey toward healing.

While finishing her Psychology degree, Claire reached out to top professionals in the industry to learn from the best and obtain the best resources for families and loved ones affected by addiction. With over 20 years of personal sobriety, which she began as a teen, she has a unique perspective on working with adolescents and young people in early sobriety.

Claire has years of professional and clinical experience with some of the top adult and adolescent treatment centers in her area and knows the best resources to help you make critical decisions for your loved one. She looks forward to working with Patti on a 4-week comprehensive family program to further assist families and increase her knowledge by working with one of the most accomplished leaders in the substance abuse field.
