

HORMONE THERAPY: NOT JUST FOR MENOPAUSE

Hormone therapy isn't just for menopause - it's a valuable option for women of all ages. Whether you're dealing with hormone imbalances due to aging, genetics, or other factors, the pharmacists at The Apothecary collaborate with medical practitioners to personalize prescriptions for hormone replacement therapy that meets your unique needs. No more one-size-fits-all treatments! With our collaborative approach, we tailor medications specific to your body and provide you with the best possible results. Don't let hormone imbalances hold you back any longer.

Post source: P3Rx.org

It's Called: cBHT

Compounded: because it's made just for you, like a tailored suit.

Bioidentical: because it's identical to your body's natural hormones,

Hormone therapy: because your body (like many people's!) isn't making enough

cBHT has been used for decades and improved a lot of lives. If you think it's just about menopause, it may surprise you what some of the other conditions cBHT is used for:

Chronic Fatigue
Fibromyalgia
Endometriosis

Andropause
Hypothyroidism
Hypoadrenalism

Female Sexual Dysfunction
Vaginal Dryness
Osteoporosis

Infertility
Postpartum Depression
Premenstrual Syndrome

The dosage form depends on the hormone. Certain hormones are not absorbed well orally or may cause effects that may not be desirable when taken orally. These are the typical dosage forms we compound with each hormone:

- Progesterone – capsules, cream, troche
- Estrogen – cream, troche
- Testosterone – cream, troche

****The patient-prescriber-pharmacist relationship is critical when making cBHT decisions! Make sure you have open and honest discussions with your health care practitioners.****

ALREADY USING COMPOUNDED HORMONE THERAPY? SHARE YOUR STORY!
THE FDA IS CONSIDERING RESTRICTING OR EVEN ELIMINATING CBHT, AND WE WANT TO SHOW HOW MANY LIVES IT'S CHANGED FOR THE BETTER.
