ProTec U	ProTec U	This came from a voicemail Neil received from John Felli: "Hey Neil this is John with a 360 out in IE. Hey, I just wanted to call and say thank you. I took the welding class a few months back and I have been welding but mostly brazing and stick weld but wire feed is pretty new to me.I just wanted to let you know that since that class, it's really coming together for me. I've been doing pretty good work every time they send me out on a welding jobs. it's just seems like my beads are getting tighter and tighter and better and better so I just want to take a moment to thank you for giving me the opportunity to take that class because I was really uncomfortable going out there expecting or being expected to do a decent weld. I never actually welded with wire before. I struggled with finding the right heat and speed. I'm really grateful that I took that class. Anyway, I just wanted to say thank you for what you guys are doing there and I can honestly tell you that it absolutely helped me. I feel a lot more confident and it's another feather in my cap."
