

Android Phones – KNOWIFY TIP!

Great Tip!– you can use your translation icon in conjunction with the microphone feature.

IMPORTANT: **Keyboard must have both languages as options first. Feel free to let me or the IT team know if you need assistance 😊

If you don't see the Translation Icon follow the below instructions – if you don't see below options you may have an older phone and can't be set up.

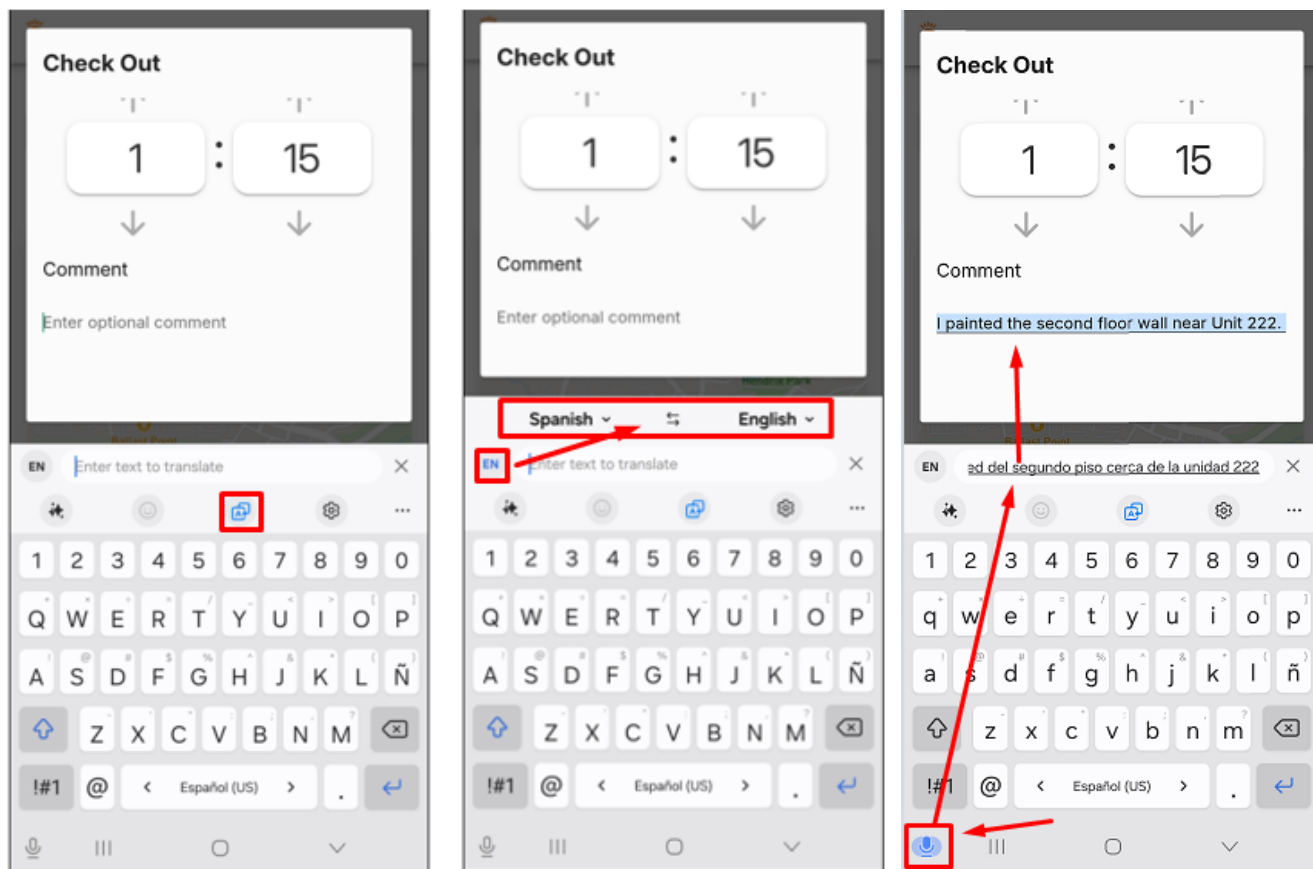

Next are the steps once you have the Translation Icon ready to go

Click on Translation Icon to activate

You can check your languages by Clicking on the **EN** , there you can see from what language to what language it is being translated to

Click on the microphone and start talking - you will see it populate in the text bar in the language you are saying then you will see it automatically populate the translated language selected. **Important Tip:** one you are done talking click on the microphone again – otherwise it will keep translating what you are saying.

Verify description and then click submit.
