

Introducing the new Element Series Integrated Amplifier

Changes the rules of engagement.
80 Watt-per-channel integrated amp with DSP

This integrated amplifier marks ELAC's return to the amplifier category. The Element Series EA101EQ-G Integrated Amplifier solves two of the biggest problems with two-channel audio: proper blending of a subwoofer with your main speakers and room correction. Our advanced DSP and innovative smartphone application provide all the tools necessary for anyone to achieve a true audiophile system at an affordable price.

The Element EA101EQ-G makes quite a statement and is guaranteed to change the rules of the game for integrated amplifiers, with sound quality and feature-rich control flexibility that make it the go-to solution for a no-compromise sound system. Once you experience what it can do—especially with the new Debut, Uni-Fi, or Line 240.3 loudspeakers—your world of sound just might be altered forever.

ANNIVERSARY 1926 2016 JUBILÄUM

Expect innovation.
