

MAKERSPACE

kit

May 17, 2023

Are you ready to create a Makerspace or STEM lab at your school but you're not quite sure where to start?

Whether you're starting from scratch or renovating an existing space, this workshop will provide you with a structured protocol for planning, designing, and stocking your Makerspace to best meet the needs of *your* students at *your* school. Rather than a one-size-fits-all approach, you'll learn the tricks of tailoring the space to your needs.

You'll also experience introductory, hands-on lessons on the popular technologies found in today's makerspaces including 3D printing, CNC carving, laser cutting, and coding. This overview will help you make smart decisions within your budget.

Join us and learn everything you need to build the makerspace of your students' dreams!

Date: May 17, 2023
Time: 8:30am–3pm
Location: Regional Office of Education
Cost: \$40
