

Increase pharmacy productivity and safety with innovative and economical devices designed to protect your compounded preparations.

For 50 years, IMI has worked closely with pharmacists and compounding professionals to create innovative products that meet very specialized needs. IMI continuously remains at the forefront of developing new products specifically designed for the compounding industry.

IMI offers the popular Prep-Seal™ Luer Lock Syringe Cap in a convenient sterile tray of 10 units. If your compounding needs call for volume capping of syringes, the Prep-Seal luer lock cap is the perfect solution. A unique “keyed” tray bottom lets you install caps quickly and efficiently with a simple twist of the syringe; further enhancing aseptic technique.

The perfect companions to our Prep-Seal™ Luer Lock Syringe Caps are the Prep-FillTM Guarded Luer Lock connector products. They offer the ability to easily transfer or mix solutions via syringes or other standard luer lock devices or tubing sets.

IMI offers a variety of devices designed for the compounding pharmacist as well, including:

- Prep-Lock™ - Tamper Evident Caps for Oral Dispensers
- Prep-Lock™ - Tamper Evident Caps for Sterile Luer Lock Syringes
- Prep-Seal™ - Sterile Luer Lock Caps & Plugs
- Prep-Fill™ - Sterile Luer Lock Connectors
- Rx-Vent™ - Sterile Venting Needles
- Rx-Tract™ - Sterile Aspirating Needles
