

Keep track of what your Child is doing during Remote Learning[©]

Directions: Use this form to keep track of your child's progress, lack of progress or regression during Remote Learning, to help inform the school of your child(ren)'s present level when they return to school and to document missed services to support possible compensatory services. For a description of the task, please utilize the key below to record the type of work your child has been assigned, for each school day. The independent work and the work with school staff charts contain similar information, with the exception that you are not marking accuracy for the school chart. For the school chart, you would record the prompts that you and the school staff are giving. Use the numbers 2 and 4 if you see that your child is in between the engagement levels.
