Why choose a summer learning program?

Summer learning loss is a real thing. Studies suggest children lose 25-30% of their school year learning. Also, we see a sharper decline in math than in reading during summer vacation. This loss becomes larger as your child progresses in higher grades. To combat this, experts suggest that students enroll in programs that provide high quality learning mixed with recreational enrichment. Our program is perfect for children who are struggling and need a little extra help, as well as students who are doing great in school and want to keep a competitive edge.
