

[GAIN Clean Fuel](#), a brand of U.S. Gain, has been a Wisconsin Clean Cities member since 2011. Scott Hanstedt, director of sales, serves on the Wisconsin Clean Cities board of directors.

GAIN Clean Fuel is diligently working to expand supply of renewable natural gas (RNG), while seeking opportunities to grow its 50+ fueling station network through both public and private station builds. As part of U.S. Venture, a family-owned company with 60 years serving the transportation industry, GAIN Clean Fuel will find a better way for your fleet to succeed – environmentally and economically.

GAIN Clean Fuel is making investments and partnering with leading waste producers and developers to expedite supply of renewable natural gas, the only carbon-negative fuel. With a strong pipeline of projects, GAIN Clean Fuel has an abundant supply of RNG, but strongly believes demand will continue to increase and is committed to continued investment in RNG development.

From financing options to compliance expertise and dispensing capabilities – GAIN Clean Fuel has the credentials and experience to take your RNG project further, faster.

With more than 50 fueling stations that feature unprecedented quality and uptime, GAIN Clean Fuel is the partner you need for your next station. Public or private, fast-fill or time-fill, GAIN Clean Fuel will discuss options to determine your ideal fueling experience. And, through their meticulous attention to detail, rest assured the station will be constructed to meet both your current and future needs, without over-engineering. GAIN Clean Fuel can even cover the station cost!

Have a fueling station that's in need of updating? GAIN Clean Fuel can help with that too.

GAIN Clean Fuel realizes the importance of financial incentives to both alternative fuel development and use, which is why the company actively lobbies in support of programs that support clean fuel initiatives.

Giving back is at GAIN Clean Fuel's core, embracing collaboration and social innovation through its philanthropic efforts. Through the U.S. Venture Open, the U.S. Venture/Schmidt Family Foundation, the U.S. Venture Fund for Basic Needs and the unique partnership with Victory Community Development Center (VICODEC) in Kenya, GAIN Clean Fuel challenges itself and its partners to address the root causes of poverty and to improve the quality of people's lives.
