

[WPPI Energy](#) – headquartered in Sun Prairie, Wisconsin – has been a Wisconsin Clean Cities member since 2018.

Member-owned, not-for-profit WPPI Energy serves 51 locally owned electric utilities. Together, WPPI members have built a diverse, competitive and responsible power supply. They share advanced technologies and forward-thinking services, and they speak with a unified voice for effective energy policy advocacy.

Locally owned, not-for-profit, public power utilities bring significant value to their communities. WPPI Energy stands behind its member utilities to help them preserve and enhance this value for the long term, with:

- A reliable, affordable, responsible power supply
- Cost-effective shared programs and services
- An effective voice for energy policy advocacy

WPPI Energy member utilities are stronger together. This is the joint action advantage of 51 local utilities partnering for the benefit of the customers and communities they serve. Learn more: [WPPI Energy At A Glance](#).

Member utilities give customers the option of [purchasing renewable energy](#) through the Choose Renewable program. For \$3 per block, customers can power a portion of their home with a block of renewable energy - clean and affordable power from natural resources like wind, solar and biogas. It only takes two or three blocks of renewable energy to power the average home every month. It adds up to a smaller carbon footprint and a cleaner world.

Of course, renewable energy isn't just good for the planet. It can also help control energy costs over the long haul. The money spent on renewable energy goes toward new, green energy alternatives that will help control energy costs in the future. And because it is generated in the Midwest, renewable energy can help increase our energy independence.
