

[CMD Corporation](#) -- headquartered in Appleton, Wisconsin -- became a Wisconsin Clean Cities member in 2015. Business Development Manager Brad Schmoll serves on the Wisconsin Clean Cities Board of Directors and is a member of its Executive Board.

CMD is a technology-driven innovator of machinery and automation for manufacturing plastic bags, pouches and specialty converted products for applications from consumer goods to medical and food. CMD is also a growing supplier for compressed natural gas (CNG) refueling systems. CMD Corporation offers custom and stock machinery, replacement parts, upgrade kits and engineering and technical services in the Americas, Europe, Asia, Australia and the Middle East.

The company was founded in 1980 with a passion for equipment technology that solves real problems for people. Through a history of perseverance and a disciplined approach to innovation, CMD has emerged as a unique company among machine designers and builders - one that advances technology and takes what is - and makes it better.

A creative culture of collaboration is important at CMD and its incredible people strive to grow value for its customers in all they do. Equipment is designed and manufactured from CMD's world headquarters in Appleton, Wisconsin, which serves a global marketplace through a network of sales and service offices and agent networks.

As a privately owned, financially stable company started in 1980, CMD has invested in the design and manufacturing facilities and technical talent to deliver exceptional standard and customized equipment for many industries. CMD holds more than 65 patents worldwide and has more than 140 applications in progress. [VIDEO: Learn more about CMD Corporation](#)

CMD continually works to minimize the total environmental impact of its products. The company design's efficient equipment that uses less energy, creates less waste and provides long-lasting value. Their business and manufacturing processes conserve energy and material use and they benchmark and use LEAN manufacturing standards as their guide.
