

[Time Transport](#) has been a Wisconsin Clean Cities member since 2011. Lisa Morris, Time Transport's HR & Safety Director, has served on the Wisconsin Clean Cities Auxiliary Board since 2014.

The family business, originally established in 1997 has been in its new facility on 20 acres in Racine County since 2012. More than 90 percent of the company's fleet is now powered by compressed natural gas. Of its 68 units, 61 are compressed natural gas-powered. Time Transport continues to work toward 100% compressed natural gas.

Time Transport was able to make its first 15 CNG purchases with the help of several grants made possible through Leonardo Academy, the U.S. Environmental Protection Agency and the Wisconsin State Energy Office. Wisconsin Clean Cities (WCC) gave visibility to these opportunities and for that, Time Transport is so appreciative. Through WCC, Time Transport was awarded another grant in 2013 and became a part of the U.S. EPA's SmartWay Program.

Time Transport is proud to be part of the "WhyCNG? Movement" and being a Wisconsin Smart Fleet member is ensuring that the company continues to advance as a leader in southeastern Wisconsin with regard to Class 8 CNG-powered units.

The WSF program allowed Time Transport to assess its current fleet and measure how it was meeting the company's sustainability goals. Furthermore, it pushed the company to plan its future fleet goals. With the help of WSF, Time Transport will continue to address the challenges and enjoy the benefits of this fast-moving technology.

Time Transport is proud of its achievements, including:

- **WCC Forward Fleet Awards:** Time Transport received the Wisconsin Clean Cities Forward Fleet Award for three consecutive years (2017-2019) for the company's use of alternative fuels and sustainable transportation options to reduce petroleum use and greenhouse gas emissions.
- **MillerCoors Supplier of the Year Award:** Time Transport, Inc. received the 2016 Regional Logistics & Transportation Supplier of the Year Award from MillerCoors. The award followed an analysis of metrics of contract transport service with a special emphasis on on-time pick-ups and deliveries. Time Transport, Inc. reported greater than 98 percent on-time service.
- **SmartWay High Performers Award 2017:** Time Transport was recognized in 2017 by the SmartWay Transport Partnership with the High Performers Award for going above the already high standards set forth for Smartway Partners and achieving significant shipping and freight efficiencies that merit special attention.
