

**B&W**  
MEGTEC

**BioCYCLE** 17TH ANNUAL CONFERENCE  
**REFOR17**  
RENEWABLE ENERGY FROM ORGANICS RECYCLING

## **Two Scrubbing Systems Capture More Than 98% of Methane**

B&W MEGTEC offers two variations of biogas purification equipment to remove particulate, H<sub>2</sub>S, CO<sub>2</sub>, H<sub>2</sub>O and siloxanes from digester, wastewater treatment, landfill, or other biogas streams.

Water scrubbing and amine scrubbing are each effective at biogas purification. Both systems can be tailored to suit application-specific needs. They are designed to capture more than 98 percent of the methane and purify it to pipeline-quality natural gas; each system uses self-regenerating desiccant dryers to dry the product gas to a dew point of 40 F (-40 C).

Take a closer look: <http://www.babcock.com/en/products/biogas-purification-systems>

You can also visit us in booth #17 at the 17<sup>th</sup> Annual BioCycle Conference on Renewable Energy from Organics Recycling, Oct. 16-19, Red Lion Hotel, Portland, Oregon. <http://www.biocyclerefor.com>

We look forward to seeing you at the show.

Very best regards,
