

# Petition to Education Officials in the EU and its Member States

Availability of Choice is Endangered:

A Citizens Movement for a Human-centered Education

Economics and politics are driving the rapid digital transformation of our society. In our schools this takes place under the heading “Digital Education/ IT” through technologies such as smartphones, tablets and WiFi. As a result, education, schooling and learning, begin to be defined by technology and rather than human beings. The signers of this petition are committed to promoting human-centered education based on the stages and lawfulness of the physical, emotional and spiritual development of the human being.

Name	Address	E-Mail	Signature

A petition organised by, **Bündnis für humane Bildung**' <http://www.aufwach-s-en.de/> and the
